(54) POLARIZING PLATE FOR LIQUID CRYSTAL DISPLAY ELEMENT AND MANUFACTURE THEREOF

(57)Abstract:

PROBLEM TO BE SOLVED: To provide the polarizing plate for a liquid crystal display element with excellent dampproofing and the manufacturing method capable of obtaining the polarizing plate efficiently.

SOLUTION: The polarizing plate is equipped with at least one polarizing plate main body 2 which has a polarizing function and a dampproof layer 4 provided on at least one exposed end surface of the polarizing plate main body 2. Further, a laminated body is formed by stacking polarizing plate main bodies 2 having the polarizing function and while the laminated body is rotated on an axis perpendicular to the main surface of the polarizing plate main bodies 2, dampproof layers 4 are formed on the end surfaces of the polarizing plate main bodies 2.
